

Press Release

15th May 2007

Cellcrypt, a company focused on providing secure voice encryption software for mobile phones and other mobile devices has today announced the appointment of Fiona Strens as Non Executive Director, effective immediately.

Fiona brings to Cellcrypt a wealth of experience gained in the defence and security sector. After completing a degree in Computer Sciences at Cambridge University, Fiona joined the Ministry of Defence and spent 11 years there focusing on policy and technology. Fiona has most recently been working as a consultant to Government and Industry in the defence and security sector and has a particular interest and expertise in the information security needs of the UK Government market.

The core business of Cellcrypt is to provide voice, VoIP, and mobile security products to enterprise users. The growth of user mobility and need for greater privacy is driving sweeping changes in the way we communicate, creating opportunities for innovative technologies. The Cellcrypt solution is a software suite aimed at those who need to speak across different networks and domains while having comprehensive end-to-end encryption for the purpose of security and privacy.

Rodolfo Rosini, CEO of Cellcrypt, commented on Fiona's appointment: "We are extremely pleased that Fiona will be joining the Cellcrypt team. She will form a vital addition to our ever strengthening leadership team and with her excellent experience will play an important role in pushing our business ahead."

Fiona Strens commented on her appointment: "We often hear stories in the news that illustrate the difficulties that Governments face keeping sensitive information secure. At the same time the trend is towards more flexible and mobile working and greater cooperation with others to deliver outcomes. There is a massive opportunity for Government Departments around the globe and their commercial partners to exploit technology, such as the Cellcrypt Communicator, to enable mobile working whilst enhancing confidence in the confidentiality, integrity and availability of business-critical information."

Shimi Shah, a Director at Porton Capital, the major investor into Cellcrypt said: "Fiona's appointment will be key in driving the business forward and her excellent links into the core target areas of the business will help the company continue to enjoy ever increasing growth."

Notes to Editors:

Cellcrypt Ltd is a privately held company based in London, UK, with offices in California. The company was started in 2005 by an experienced team backed by a strong technology advisory board. The focus of Cellcrypt is to provide voice and VoIP security products to enterprise and government users. The growth of user mobility and the need for greater privacy is driving sweeping changes in the way workers communicate, creating opportunities for innovative technologies. Our flagship solution is a software suite aimed at those who need to speak across different networks and domains while having a comprehensive end-to-end encryption solution. Cellcrypt also provides solutions to address the specific compliance needs of financial institutions and homeland security customers.
